

## Hospital Program Operations and TEMIS

### [Section Summary and Statistics]

Coordinate and conduct contract monitoring, site visits, data validation and evaluation of quality improvement programs for each hospital specialty program, as well as staffing, attending, and completing assignments for the various associated committees:

- 72 9-1-1 Receiving hospitals
- 14 Trauma Centers
  - THAC (Trauma Hospital Advisory Committee)
  - THAC Quality Improvement (QI)
  - THAC Data Committee
- 21 Base Hospitals
  - BHAC (Base Hospital Advisory Committee)
- 44 Emergency Departments Approved for Pediatrics (EDAPs)
- 7 Pediatric Medical Centers (PMCs)
  - PdLN (Pediatric Liaison Nurses)
  - ICAN (Interagency Council on [Child] Abuse and Neglect)
  - COPEM (Committee on Pediatric Emergency Medicine)
- 10 Sexual Assault Response Team (SART) facilities
  - SART Committee
- 33 STEMI (S-T Elevation Myocardial Infarction) Receiving Centers (SRC)
  - SRC Advisory Committee and regional meetings
- 14 Approved Stroke Centers (ASC)
  - ASC Advisory Committee meetings *[pending – new program]*
- Other miscellaneous meetings under Hospital Programs:
  - 9-1-1 Receiving Hospitals Regional Meetings
  - EMS Orientation
  - Prehospital Care Coordinator (PCC) Orientation
- Other major assignments under Hospital Programs:
  - Annual revision of the EMS Plan required by California's Health and Safety Code
  - Provide medical expertise for the Physician Reimbursement program
  - Investigation, research and fact-finding of patient care issues and concerns.

### **Trauma and Emergency Medical Information System (TEMIS)**

- Staff prepare and develop reports and datasets in response to requests from Board of Supervisors, facilities, providers and the public
- Utilizing an Epidemiologist, develop and distribute various system reports, including:
  - Trauma System Quality Control and Quarterly Report
  - Hospital 9-1-1 Services Impact Survey
  - ED 911 Diversion History Report
  - EMS Fact Sheet (shows EMS volume, Base Hospital Contact volume, Whole Trauma Center Volume and Major Breakdowns)
  - Trauma System Epidemiological Report for LA County
- Manage LA County's participation in the National Trauma Database (NTDB)
- TEMIS utilizes Lancet Technology for management of our three major databases: Trauma, Base, and EMS.
- Provide technical assistance and consultation to hospital and EMS personnel regarding timely and accurate data collection and submission
